Layers

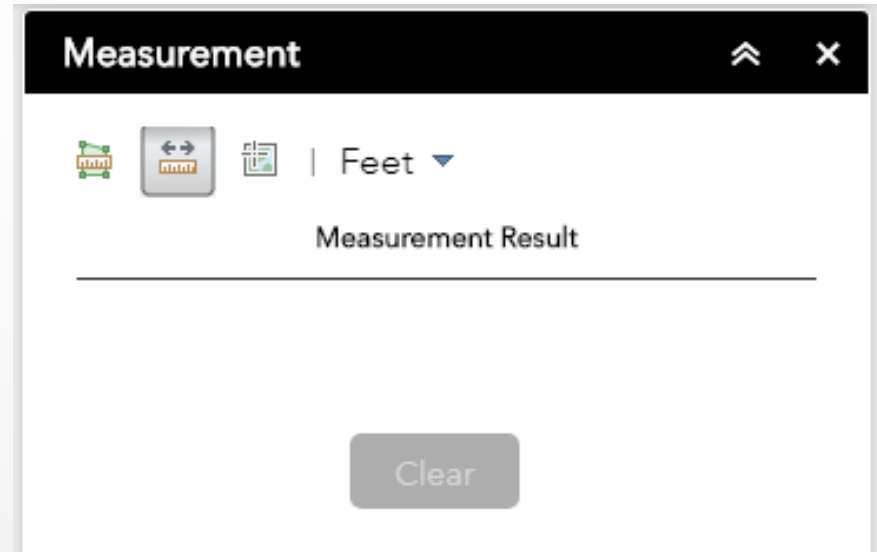

- This is where you can adjust the data you are viewing on the map.
- Check/uncheck boxes to turn on/off layers.
- Grey layer names mean that you're not in the visible range for that dataset.

Measure

- You can measure by length, area, or location.
- Adjustments can be made to the units by using the drop-down menu displaying the current unit of measure.
- Clicking “Clear” will remove all measurements on the map.

Print

- Allows the printing of maps in Portrait, Landscape, or Map Only modes.
- The title will be displayed on the printout.
- The format can also be adjusted but Adobe PDF is recommended and the default.

A screenshot of a software print dialog box. The title bar is black with the word 'Print' in white, and it includes a maximize icon and a close icon. The main area has a white background. It contains three rows of controls: 'Map title:' with a text input field containing 'GIS Site Map'; 'Layout:' with a dropdown menu showing 'LetterLayout'; and 'Format:' with a dropdown menu showing 'PDF'. At the bottom right, there are two dark blue buttons: 'Advanced' with a gear icon and 'Print' with a printer icon.

Print

Map title: GIS Site Map

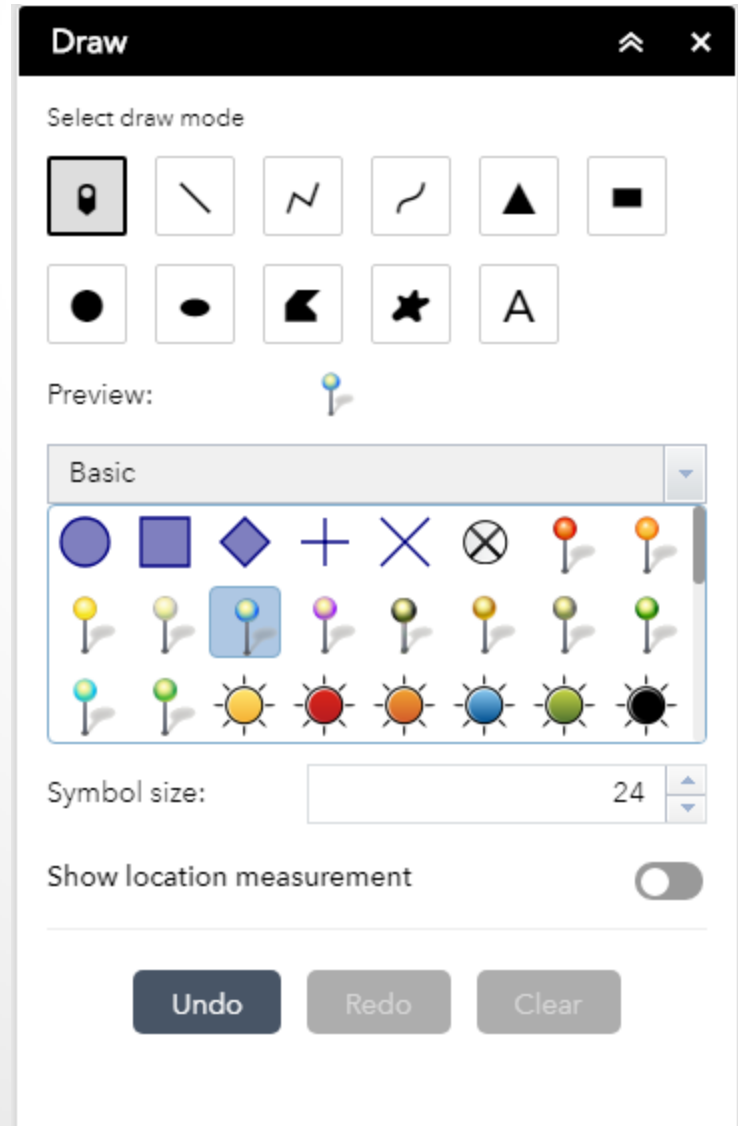

Layout: LetterLayout

Format: PDF

Advanced Print

Draw

- Draw will allow you to make temporary features on the map.
- Clicking “Clear” will remove all drawings on the map.

Swipe

- Reveals layers beneath the layer being swiped.
- Click and drag gray box to swipe
- Multiple imagery layers need to be turned on in order to swipe.
